SUMMARY

I research with rigor and build what I research. Fourteen years in digital product, most of them inside R&D institutes for Nokia, Alcatel, Samsung and Motorola, where design work starts before the screen: understanding the problem, investigating with users, testing hypotheses and turning that into product decisions. Research is my strength — running interviews, synthesizing findings and presenting them in a way that changes what the team decides. I also work with metrics and instrumentation, and use AI and code to take a project from investigation to a product that ships. English: professional working proficiency.

EXPERIENCE

Co-founder | Senior Product Designer

RISE Design & Branding — Manaus, Brazil

Jan 2026 – Present

- Products and websites in production, from concept to deploy: research, design, front-end and data instrumentation.
- AI-assisted development with Claude Code and Cursor; stack on Vercel and Supabase.

Senior Product Designer

ClearSale / Serasa Experian — São Paulo, Brazil (remote)

Apr 2022 – Jan 2026

- **Data Trust platform** — ran research with users of the legacy platforms, consolidated the findings into a report and presented them directly to leadership. The insights were incorporated into the new platform.
- **APA optimizer (anti-fraud)** — ran the research and hypothesis mapping in one week; the recommendation led to an improvement shipped by the engineering team.
- **Structured failure investigation** — mapped hypotheses and platform pain points with the team, building a repeatable analysis process.
- **Product metrics** — defined KPIs and the measurement plan using GTM/Data Layer, Google Analytics and Clarity.

Senior Product Designer

Eldorado Research Institute (Motorola) — Manaus, Brazil

Aug 2021 – Apr 2022

- Product research and design for Motorola, across web and Android solutions.
- Hypothesis creation and validation, with user research and testing driving the definition of the solution.
- Flows, wireframes and diagrams.

Product Designer (Mid → Senior)

SIDIA — Institute of Science and Technology (Samsung) — Manaus, Brazil

Jul 2017 – Aug 2021

- Product research and concept design at Samsung's R&D institute, working across device lines — smartphone, TV, wearable and AR/VR.
- **AR Egg Hunt** (Iguatemi Mall, São Paulo) — augmented-reality mobile app built to drive mall footfall. End-to-end UX/UI, from flow to interface.
- **Descubra Manaus** — immersive tourism in AR/VR: a city-wide treasure hunt with a collectible postcard set of local landmarks.
- **ai0** — personal assistant bringing weather, commute, calendar and news into one conversational screen with voice control. Research, naming, identity and screens, in a pair.
- Ran user research and built flows, journeys and diagrams for product concepts.
- Facilitated concept workshops with cross-functional teams.
- Acted as a design evangelist, spreading research practice and design thinking internally.

Junior Product Designer

ITRIAD Research & Development (Alcatel) — Manaus, Brazil

Oct 2016 - Jul 2017

- **RFID shipping process** — mapped the factory's full shipping and export process, then run on spreadsheets, to inform the design of a system. Field research with operations teams and translation of the workflow into product requirements.
- **Alcatel Pay** — card wallet for mobile phone payments. Flows and interactive prototypes, with continuous validation alongside the client.

Trainee

Microsoft — Lisbon, Portugal

Feb 2015 - Aug 2015

- **WorldSearch** — concept, wireframes and style guide for the search application.
- Product design in a multicultural environment, collaborating with global teams and working in English in a professional context.

Design Intern

INDT — Institute of Technological Development (Nokia) — Manaus, Brazil

Sep 2013 - Aug 2015

- **ClaroMúsica** — redesign of the music streaming app, and **ClaroMúsica ASHA**, the version for the Nokia Asha feature phone line, under heavy screen and resource constraints.
- Ideation, hypothesis validation, wireframes and flows, plus spreading design thinking across cross-functional teams.

Design Scholarship Holder

FUCAPI — Manaus, Brazil

2012 - 2013

- Institutional and educational projects: **Selo Amazônico** website, **Cenário Virtual**, banners and infographics.
- Layouts, interfaces and visual assets for digital and e-learning environments.

SIDE PROJECT

Neuroplasticidar — co-founder

child development platform for neurodivergent children

- Research with families and specialists, product conception, platform live in production.

SKILLS

RESEARCH

UX Research · User interviews · Qualitative research · Field research · Usability testing · Synthesis and reporting · Design Thinking

PRODUCT

Product Design · Information architecture · Flows and journeys · Wireframing · Prototyping · Design Systems · Interaction design

DATA

Product metrics · KPIs · Google Analytics · Google Tag Manager / Data Layer · Clarity · Dovetail · A/B testing · SQL

TOOLS & CODE

Figma · Claude Code · Cursor · HTML/CSS · Vercel · Supabase · Agile methodologies

EDUCATION

BA in Digital Design — FUCAPI, Manaus, Brazil · 2012 - 2015

Global Challenge in Human Computer Interaction — ISCTE-IUL, Lisbon · 2015 (exchange)

Technical Degree in Telecommunications — IFAM, Manaus, Brazil · 2008 - 2010

Product Discovery Bootcamp — HOW Bootcamps · 2023 | **Organic Marketing** — Organick · 2024
